

FOR IMMEDIATE RELEASE

VeriPic hosts the 2nd annual Digital Evidence Conference in Pasadena, CA

SANTA CLARA, California (March 5, 2015)— Enterprise software maker VeriPic, Inc. will host the second annual Digital Evidence Conference for the law enforcement community at the Hilton Pasadena Hotel, April 27 & 28, 2015. The conference will focus on the best practices and implementation of Body Worn Cameras (BWCs) for Law Enforcement Agencies including methods of training and deployment and the proper management of Digital Evidence including huge amounts of video data being produced by BWCs.

Body-worn cameras have become an important tool in the wake of several highly publicized events. Seen as a means of creating transparent public records, the technology is impacting both law enforcement and community perceptions in myriad ways. As agencies engage in the process of establishing policies and procedures for implementing camera use, they are also grappling with the financial resources and technological infrastructure needed to store rapidly increasing volumes of data in the form of Petabytes video files.

Building on the success of last year's San Francisco Bay Area conference, VeriPic's Digital Evidence Conference 2015 will offer various training sessions covering the capture and management of digital assets. Speaker sessions, featuring knowledgeable industry specialists, will focus on the latest options for storing, managing, and retrieving large numbers of video files. In addition to VeriPic, some of the country's leading manufacturers of Body Worn Cameras and photographic equipment for Law Enforcement will be represented including VIEVU, Wolfcom, Panoscan and Streaming Networks.

More information on the VeriPic Digital Evidence Conference 2015 can be found at www.DigitalEvidenceConference.com.
